When you first start, you'll be working on smaller aspects of Formbar that are less complicated. As you continue to work here, you will eventually be able to work on more complex tasks as time goes on with the appropriate training. So, to answer your question, your training will come as you work, if that makes sense. The goal is for you to be able to work on Formbar without help by the end of this year.

If you have any more questions, please continue to reach out as much as you need!

Thank you,
Alexander Plitt,
Formbar.js Development Team

Subject: RE: FormBar Application

If I understand correctly, I will be working with aspects of Formbar that are relatively independent of its entire logic, and therefore only need training on the smaller workings of Formbar as it relates to my work?

In other words, will I need to have full training on how the entire Formbar project works before I get started?

Subject: Re: FormBar Application

You will most likely be doing HTML/EJS, CSS (when needed), and lower-intensity JavaScript. Not just that, but you will also be receiving on-site training by the Senior Developers so you will eventually be able to be placed in higher intensity/higher priority situations with no issues whatsoever. When employed on our team, all of our existing members will be completely willing to answer any and all questions you may have in the moment in relation to the program(s) involved.

If there are any more questions you have about this position, please feel free to reach out.

Thanks again,
Alexander Plitt,
Formbar.js Development Team

Hello Mr. Johnson,

After careful consideration of all of our available options, we determined that out of two available positions, you would be a perfect fit for one of them, as we were very impressed with your portfolio and interview.

If you are still available and interested for this position, please respond to this email letting us know of your acceptance.

Thank you and have a great day,
Alexander Plitt,
Formbar.js Development Team
